Cognition 107 (2008) 1168–1173

COGNITION

www.elsevier.com/locate/COGNIT

Contents of volume 107

Number 1

Regular articles

LISA FEIGENSON (*Johns Hopkins University*)
Parallel non-verbal enumeration is constrained by a set-based limit, 1–18

ANDREI CIMPIAN and ELLEN M. MARKMAN (*Stanford University*)
Preschool Children's use of cues to generic meaning, 19–53

TANYA KRALJIC (University of California), SUSAN E. BRENNAN and ARTHUR G. SAMUEL (*State University of New York*)
Accommodating variation: Dialects, idiolects, and speech processing, 54–81

HENRY RAILO, MIKA KOIVISTO (*University of Turku*), ANTTI REVONSUO (*University of Turku, University of Skövde*) and MINNA M. HANNULA (*Cornell University, University of Turku*)
The role of attention in subitizing, 82–104

DOUGLAS H. WEDELL and RODRIGO MORO (*University of South Carolina*)
Testing boundary conditions for the conjunction fallacy: Effects of response mode, conceptual focus, and problem type, 105–136

WENDY J. ADAMS (*University of Southampton*)
Frames of reference for the light-from-above prior in visual search and shape judgements, 137–150

JOHANNES C. ZIEGLER, CAROLINE CASTEL (*CNRS et Aix-Marseille Université*), CATHERINE PECH-GEORGEL, FLORENCE GEORGE (*CHU Timone and Université de la Méditerrané*), F-XAVIER ALARIO (*CNRS et Aix-Marseille Université*) and CONRAD PERRY (*Swinburne University of Technology*)
Developmental dyslexia and the dual route model of reading: Simulating individual differences and subtypes, 151–178

ELISABETH PACHERIE (*CNRS*)
The phenomenology of action: A conceptual framework, 179–217

JAMIE I.D. CAMPBELL and ARRON W.S. METCALFE (*University of Saskatchewan*)
Arabic digit naming speed: Task context and redundancy gain, 218–237

doi:10.1016/S0010-0277(08)00091-7

KATHERINE S. WHITE (*Brown University*), SHARON PEPERKAMP (*CNRS, Université de Paris VIII, and Institut Universitaire de France*), CECILIA KIRK (*University of Canterbury*) and JAMES L. MORGAN (*Brown University*)
Rapid acquisition of phonological alternations by infants, 238–265

Discussion article

IAN A. APPERLY *(University of Birmingham)*
Beyond Simulation–Theory and Theory–Theory: Why social cognitive neuroscience should use its own concepts to study "theory of mind", 266–283

Brief articles

MARCI S. DECARO, ROBIN D. THOMAS (*Miami University*) and SIAN L. BEILOCK (*The University of Chicago*)
Individual differences in category learning: Sometimes less working memory capacity is better than more, 284–294

MAHA ADAMO, CARSON PUN, JAY PRATT and SUSANNE FERBER (*University of Toronto*)
Your divided attention, please! The maintenance of multiple attentional control sets over distinct regions in space, 295–303

SUSAN J. HESPOS (*Northwestern University*) and RENÉE BAILLARGEON (*University of Illinois*)
Young infants' actions reveal their developing knowledge of support variables: Converging evidence for violation-of-expectation findings, 304–316

BHUVANA NARASIMHAN and CHRISTINE DIMROTH (*Max Planck Institute*)
Word order and information status in child language, 317–329

STEPHEN R.H. LANGTON, ANNA S. LAW (*University of Stirling*), A. MIKE BURTON (*University of Glasgow*) and STEFAN R. SCHWEINBERGER (*University of Jena*)
Attention capture by faces, 330–342

DAVID P. MCCABE (*Colorado State University*) and ALAN D. CASTEL (*University of California*)
Seeing is believing: The effect of brain images on judgments of scientific reasoning, 343–352

P.E.G. BESTELMEYER, B.C. JONES, L.M. DEBRUINE (*University of Aberdeen*), A.C. LITTLE (*University of Stirling*), D.I. PERRETT (*University of St. Andrews*), A. SCHNEIDER, L.L.M. WELLING and C.A. CONWAY (*University of Aberdeen*)
Sex-contingent face aftereffects depend on perceptual category rather than structural encoding, 353–365

GRANT GUTHEIL (*Nazareth College*), SUSAN A. GELMAN (*University of Michigan*), EILEEN KLEIN (*University of California*), KATHERINE MICHOS (*Widener University*) and KARA KELAITA (*University of Hartford*)
Preschoolers' use of spatiotemporal history, appearance, and proper name in determining individual identity, 366–380

DAVID H. RAKISON (*Carnegie Mellon University*) and JAIME DERRINGER (*University of Minnesota*)
Do infants possess an evolved spider-detection mechanism?, 381–393

Number 2

Regular articles

STEVE MAJERUS (*Université de Liège, Fonds National de la Recherche Scientifique*), MARTINE PONCELET (*Université de Liège*), MARTIAL VAN DER LINDEN (*Université de Liège, Université de Genève*) and BRENDAN S. WEEKES (*University of Sussex*)
Lexical learning in bilingual adults: The relative importance of short-term memory for serial order and phonological knowledge, 395–419

GEORGE E. NEWMAN (*Yale University*), PATRICIA HERRMANN (*Northwestern University*), KAREN WYNN and FRANK C. KEIL (*Yale University*)
Biases towards internal features in infants' reasoning about objects, 420–432

DAPHNE BAVELIER, ELISSA L. NEWPORT, MATT HALL, TED SUPALLA and MRIM BOUTLA (*University of Rochester*)
Ordered short-term memory differs in signers and speakers: Implications for models of short-term memory, 433–459

CATHERINE SOPHIAN and YUN CHU (*University of Hawaii*)
How do people apprehend large numerosities?, 460–478

JENNY SAFFRAN (*University of Wisconsin-Madison*), MARC HAUSER (*Harvard University*), REBECCA SEIBEL, JOSHUA KAPFHAMER (*University of Wisconsin-Madison*), FRITZ TSAO (*Hillsdale College*) and FIERY CUSHMAN (*Harvard University*)
Grammatical pattern learning by human infants and cotton-top tamarin monkeys, 479–500

ANTONINO VALLESI (*SISSA-ISAS, Rotman Research Institute*), MALCOLM A. BINNS (*Rotman Research Institute*) and TIM SHALLICE (*SISSA-ISAS, University College London*)
An effect of spatial–temporal association of response codes: Understanding the cognitive representations of time, 501–527

CANDICE M. MILLS (*The University of Texas*) and FRANK C. KEIL (*Yale University*)
Children's developing notions of (im)partiality, 528–551

ALEX O. HOLCOMBE (*University of Sydney*) and PATRICK CAVANAGH (*Harvard University, Université de Paris*)
Independent, synchronous access to color and motion features, 552–580

EMMANUEL M. POTHOS (*Swansea University*) and JAMES CLOSE (*Cardiff University*)
One or two dimensions in spontaneous classification: A simplicity approach, 581–602

DAVID BARNER (*University of Toronto*), JUSTIN WOOD, MARC HAUSER and SUSAN CAREY (*Harvard University*)
Evidence for a non-linguistic distinction between singular and plural sets in rhesus monkeys, 603–622

SACHIKO KINOSHITA (*Macquarie University*), KENNETH I. FORSTER (*University of Arizona*) and MICHAEL C. MOZER (*University of Colorado*)
Unconscious cognition isn't that smart: Modulation of masked repetition priming effect in the word naming task, 623–649

Discussion article

MATHIEU LE CORRE and SUSAN CAREY (*Harvard University*)
Why the verbal counting principles are constructed out of representations of small sets of individuals: A reply to Gallistel, 650–662

Brief articles

REBECCA BULL, LOUISE H. PHILLIPS and CLAIRE A. CONWAY (*University of Aberdeen*)
The role of control functions in mentalizing: Dual-task studies of Theory of Mind and executive function, 663–672

CHRIS DAVIS, JEESUN KIM (*University of Western Sydney*) and KENNETH I. FORSTER (*University of Arizona*)
Being forward not backward: Lexical limits to masked priming, 673–684

MARK YATES, JOHN FRIEND and DANIELLE M. PLOETZ (*University of South Alabama*)
The effect of phonological neighborhood density on eye movements during reading, 685–692

KAI ENGBERT, ANDREAS WOHLSCHLÄGER (*Max Planck Institute*) and PATRICK HAGGARD (*University College London*)
Who is causing what? The sense of agency is relational and efferent-triggered, 693–704

GERGELY CSIBRA (*University of London*)
Goal attribution to inanimate agents by 6.5-month-old infants, 705–717

JOANNE L. BREBNER and C. NEIL MACRAE (*University of Aberdeen*)
Faces, flowers and football boots: Capacity limits in distractor processing, 718–728

ATHENA VOULOUMANOS (*McGill University*)
Fine-grained sensitivity to statistical information in adult word learning, 729–742

QI WANG (*Cornell University*)
Being American, being Asian: The bicultural self and autobiographical memory in Asian Americans, 743–751

DEBI ROBERSON, HYENSOU PAK and J. RICHARD HANLEY (*University of Essex*)
Categorical perception of colour in the left and right visual field is verbally mediated: Evidence from Korean, 752–762

MEINOU H. DE VRIES (*University of Münster*), PADRAIC MONAGHAN (*University of York*), STEFAN KNECHT and PIENIE ZWITSERLOOD (*University of Münster*)
Syntactic structure and artificial grammar learning: The learnability of embedded hierarchical structures, 763–774

KATHERINE D. KINZLER and KRISTIN SHUTTS (*Harvard University*)
Memory for "mean" over "nice": The influence of threat on children's face memory, 775–783

Number 3

Regular articles

MELISSA A. REDFORD (*University of Oregon*)
Production constraints on learning novel onset phonotactics, 785–816

PAT BARCLAY (*Cornell University*)
Enhanced recognition of defectors depends on their rarity, 817–828

ORI FRIEDMAN and KAREN R. NEARY (*University of Waterloo*)
Determining who owns what: Do children infer ownership from first possession?, 829–849

JARED M. NOVICK, SHARON L. THOMPSON-SCHILL and JOHN C. TRUESWELL (*University of Pennsylvania*)
Putting lexical constraints in context into the visual-world paradigm, 850–903

JONATHAN I. FLOMBAUM, BRIAN J. SCHOLL (*Yale University*) and ZENON W. PYLYSHYN (*Rutgers University*)
Attentional resources in visual tracking through occlusion: The high-beams effect, 904–931

CAMILLA K. GILMORE and ELIZABETH S. SPELKE (*Harvard University*)
Children's understanding of the relationship between addition and subtraction, 932–945

G.M. MCARTHUR, D. ELLIS, C.M. ATKINSON and M. COLTHEART (*Macquarie University*)
Auditory processing deficits in children with reading and language impairments: Can they (and should they) be treated?, 946–977

MATTHEW R. LONGO (*University College London*), FRIEDERIKE SCHÜÜR (*University College London, Radboud University Nijmegen*), MARJOLEIN P.M. KAMMERS (*University College London, Utrecht University*), MANOS TSAKIRIS (*University College London, University of London*) and PATRICK HAGGARD (*University College London*)
What is embodiment? A psychometric approach, 978–998

PAOLA BONIFACCI (*Università degli Studi di Bologna*) and MARGARET J. SNOWLING (*University of York*)
Speed of processing and reading disability: A cross-linguistic investigation of dyslexia and borderline intellectual functioning, 999–1017

SUSAN A.J. BIRCH, SOPHIE A. VAUTHIER (*University of British Columbia*) and PAUL BLOOM (*Yale University*)
Three- and four-year-olds spontaneously use others' past performance to guide their learning, 1018–1034

Brief articles

RICHARD A. ABRAMS, CHRISTOPHER C. DAVOLI, FENG DU, WILLIAM H. KNAPP III and DANIEL PAULL (*Washington University*)
Altered vision near the hands, 1035–1047

ANDREA M. LOFTUS, MICHAEL E.R. NICHOLLS (*University of Melbourne*), JASON B. MATTINGLEY (*University of Queensland*) and JOHN L. BRADSHAW (*Monash University*)
Left to right: Representational biases for numbers and the effect of visuomotor adaptation, 1048–1058

VICTORIA SOUTHGATE, MARK H. JOHNSON and GERGELY CSIBRA (*University of London*)
Infants attribute goals even to biomechanically impossible actions, 1059–1069

N. ESCOFFIER (*Université Claude Bernard Lyon 1, University of Georgia, National University of Singapore*) and B. TILLMANN (*Université Claude Bernard Lyon 1*)
The tonal function of a task-irrelevant chord modulates speed of visual processing, 1070–1083

TAMAR KUSHNIR, HENRY M. WELLMAN and SUSAN A. GELMAN (*University of Michigan*)
The role of preschoolers' social understanding in evaluating the informativeness of causal interventions, 1084–1092

ELIZABETH WONNACOTT (*University of Oxford*) and DUANE G. WATSON (*University of Illinois*)
Acoustic emphasis in four year olds, 1093–1101

ALASTAIR D. SMITH, IAIN D. GILCHRIST, KIRSTEN CATER, NAIMAH IKRAM, KYLIE NOTT and BRUCE M. HOOD (*University of Bristol*)
Reorientation in the real world: The development of landmark use and integration in a natural environment, 1102–1111

RUTH FILIK and ANTHONY J. SANFORD (*University of Glasgow*)
When is cataphoric reference recognised?, 1112–1121

SARAH BROWN-SCHMIDT (*University of Illinois*), CHRISTINE GUNLOGSON and MICHAEL K. TANENHAUS (*University of Rochester*)
Addressees distinguish shared from private information when interpreting questions during interactive conversation, 1122–1134

VALÉRIE CAMOS (*Université de Bourgogne & Institut Universitaire de France*) and BARBARA TILLMANN (*Université Claude Bernard Lyon 1*)
Discontinuity in the enumeration of sequentially presented auditory and visual stimuli, 1135–1143

JOSHUA D. GREENE (*Harvard University*), SYLVIA A. MORELLI (*UCLA*), KELLY LOWENBERG (*Stanford Law School*), LEIGH E. NYSTROM and JONATHAN D. COHEN (*Princeton University*)
Cognitive load selectively interferes with utilitarian moral judgment, 1144–1154

MATTHEW GOLDRICK and MEREDITH LARSON (*Northwestern University*)
Phonotactic probability influences speech production, 1155–1164

Author index for volume 107, 1165–1167

Contents of volume 107, 1168–1173
